## PROFESSIONAL SUMMARY

Full-Stack Developer with strong backend expertise and 5+ years of experience building scalable web applications, APIs, SaaS platforms and cloud-native systems. Specialized in Python, Django, Django REST Framework, FastAPI, PostgreSQL, Docker, AWS and Vue.js. Experienced in legal automation, financial platforms, geospatial systems, restaurant SaaS products and real-time communication systems. Strong focus on clean code, maintainability, testing, performance, security and practical business value.

## CORE TECHNICAL SKILLS

**Backend:** Python, Django, Django REST Framework, FastAPI, Flask, REST APIs, Celery, WebSockets

**Frontend:** Vue.js, Vuex, React, JavaScript, TypeScript, HTML, CSS, Vuetify, Bootstrap

**Databases:** PostgreSQL, PostGIS, MySQL, MongoDB, Redis, SQL, NoSQL

**Cloud & DevOps:** Docker, AWS, S3, EC2, RDS, Lambda, CI/CD, GitHub Actions, Azure DevOps, Bitbucket Pipelines

**Infrastructure:** RabbitMQ, MinIO, Airflow, Keycloak, Grafana, Prometheus, Loki, Nginx

**Architecture:** Multitenancy, Clean Architecture, SOLID, Microservices, OAuth2, JWT Authentication

**Data & Automation:** LangChain, OpenAI API, RAG, Embeddings, NLP, Pandas, NumPy, scikit-learn, Matplotlib

**Tools:** Git, GitHub, Bitbucket, Jira, Azure DevOps, Linux, Bash

## PROFESSIONAL EXPERIENCE

### Backend Python Developer | Ghenova | 05/2025 - Present

*Technologies: Python, Django, FastAPI, PostgreSQL, PostGIS, Docker, Keycloak, MinIO, Airflow, RabbitMQ, Azure DevOps, Grafana, Prometheus, Loki*

- Develop and maintain backend services for geospatial and data-driven platforms using Python, Django/FastAPI and PostgreSQL/PostGIS.
- Contribute to scalable APIs, authentication flows, data ingestion workflows and deployment automation.
- Work with Keycloak, OAuth2/JWT, MinIO, Airflow, RabbitMQ and containerized environments.
- Support observability and monitoring practices using Prometheus, Grafana and Loki.

### Backend Developer | Voyc AI | 04/2025 - 06/2025

*Remote contract - South Africa | Technologies: Python, Django, Django REST Framework, PostgreSQL, WebSockets, Celery, RabbitMQ, speech recognition services*

- Built a Django/DRF backend that streamed live call audio to a speech-recognition service through WebSockets.
- Processed transcripts, real-time alerts and call events with reliable low-latency event handling.
- Stored transcripts, alerts and operational metrics in PostgreSQL for monitoring and follow-up workflows.
- Focused on reliable data flow, asynchronous processing and stable backend communication between services.

### Founder / Full-Stack Developer | MagisMenu | 2024 - Present

*Technologies: Python, Django, DRF, Vue.js, Vuetify, PostgreSQL, WebSockets, Docker, AWS, GHCR, Redis*

- Created and launched a SaaS platform for restaurants focused on digital menus, QR ordering, self-service flows and real-time kitchen operations.
- Designed a multitenant architecture for restaurants, bars and cafeterias, with isolated business data and scalable backend APIs.
- Built QR table ordering, self-service kiosk flows, waiter tablet workflows, kitchen screens, order status displays and admin dashboards.
- Implemented real-time order management using WebSockets and responsive frontend interfaces with Vue.js and Vuetify.

### Full-Stack Developer | Grupo Planeta - Aidea Legal | 03/2024 - 03/2025

*Technologies: Python, Django, DRF, Vue.js, Vuex, PostgreSQL, AWS, Docker, OAuth2, Bitbucket, Jira*

- Developed and maintained a Dockerized legal automation platform using Django REST Framework and Vue.js/Vuex.
- Worked with multitenant architecture, PostgreSQL, AWS services and OAuth-based authentication flows.
- Contributed to backend APIs, frontend features, deployment planning, CI/CD workflows and infrastructure improvements.
- Participated in architecture decisions for a scalable legal automation system and collaborated through Jira and Bitbucket.

### Django Backend Developer | Stocken Capital | 05/2023 - 01/2024

*Technologies: Python, Django, Django REST Framework, PostgreSQL, Celery, AWS, Blockchain, GitHub, Jinja*

- Maintained and refactored Django backend services for a financial platform related to investments, payments and blockchain data flows.
- Developed new APIs, improved existing features and supported backend business rules for financial operations.
- Integrated blockchain-related data transfers and worked with payment logic and transaction workflows.
- Improved code quality, maintainability and stability in an existing production system.

## Full-Stack Developer | Uvocorp / Fiverr - Freelance | 05/2021 - 01/2026

*Technologies: Python, Django, Flask, FastAPI, SQL, Pandas, NumPy, scikit-learn, Matplotlib, React, JavaScript, HTML, CSS, GitHub*

- Built web applications, automation tools and backend systems for different clients using Django, React and Python.
- Developed a Django application for a Brazilian municipality to register candidates and issue bank slips for public competition registrations.
- Delivered backend logic, database models, user interfaces and deployment support for applications with high simultaneous user traffic.
- Created automation and data-processing scripts using Python libraries and backend frameworks.

## Full-Stack Developer | IDATIS - Volunteer | 01/2023 - 05/2023

*Technologies: React, JavaScript, HTML, CSS, GitHub*

- Collaborated with the frontend team to introduce new features and improvements to a web platform.
- Developed frontend features using React, JavaScript, HTML and CSS in a distributed volunteer environment.

## Owner and Technician | Triac Solucoes em Eletronica | 03/2000 - 08/2023

*Technologies: HTML, CSS, JavaScript, APIs, Assembly, C++*

- Managed business operations, finances, clients, technical services, hiring and team training.
- Developed and maintained the company website and worked on electronics projects, circuit design and microcontroller programming.
- Built a strong technical foundation in hardware, troubleshooting, systems thinking and customer-oriented problem solving.

## EDUCATION AND CERTIFICATIONS

---

**Red Hat OpenShift Applications with Kubernetes** | Red Hat - 04/2025 | OpenShift, Kubernetes, cloud-native development  
**AWS Fundamentals Specialization** | Amazon Web Services - 02/2024 | Core AWS services, security concepts, migration strategies, serverless applications

**Advanced Django: External APIs and Task Queuing** | Codio - 12/2023 | Django REST Framework, Google authentication, Celery, Redis, caching, testing, external APIs

**Meta Front-End Developer** | Meta - 05/2023 | React, JavaScript, UI/UX design, version control, TDD, HTML and CSS

**Django for Everybody** | University of Michigan - 01/2023 | Django, Python, SQL, HTTP, authentication, sessions, cookies, CSRF protection

**Introduction to Machine Learning on AWS** | Amazon Web Services - 01/2023 | Artificial intelligence, machine learning and ML models

**Programming in Python** | Meta - 10/2022 | Python, OOP, computer programming, Django fundamentals

**Version Control** | Meta - 10/2022 | Git, GitHub, distributed version control, Linux web development, Bash

**Databases for Back-End Development** | Meta - 10/2022 | MySQL, DBMS and database administration

**Full Stack Software Developer** | IBM Skills Network - 11/2022 | Cloud-native development, DevOps, IaaS, PaaS, SaaS, hybrid multicloud, JavaScript

**Industrial Computing** | ETEP Centro Universitario - 12/2000 | Assembly programming, C++, Pascal, Access Database

## LANGUAGES

---

Portuguese: Native | Spanish: C2 | English: C1 - EF SET Certificate

## ADDITIONAL STRENGTHS

---

Practical experience combining software engineering, product development, business ownership and technical problem solving. Comfortable working independently, learning quickly and delivering complete solutions from architecture and backend implementation to frontend, deployment and monitoring.
